

Tracoe Twist Plus – REF 312

Tracheostomy tube with low pressure cuff and double fenestration at inner and outer bend

Product Description

The Tracoe Twist Plus tracheostomy tubes are used as ventilation and therapy tubes with inner cannulas in hospitals, rehabilitation, and community settings. A special feature is the curved neck flange that moves in both the vertical and horizontal axes, following the movements of the patient's head. The thin tube walls of inner and outer cannulas allow for a good inside - outside diameter ratio. Tracoe Twist and Twist Plus tracheostomy tubes are made of polyurethane (PU). The low-pressure cuff is made of medical grade PVC.
